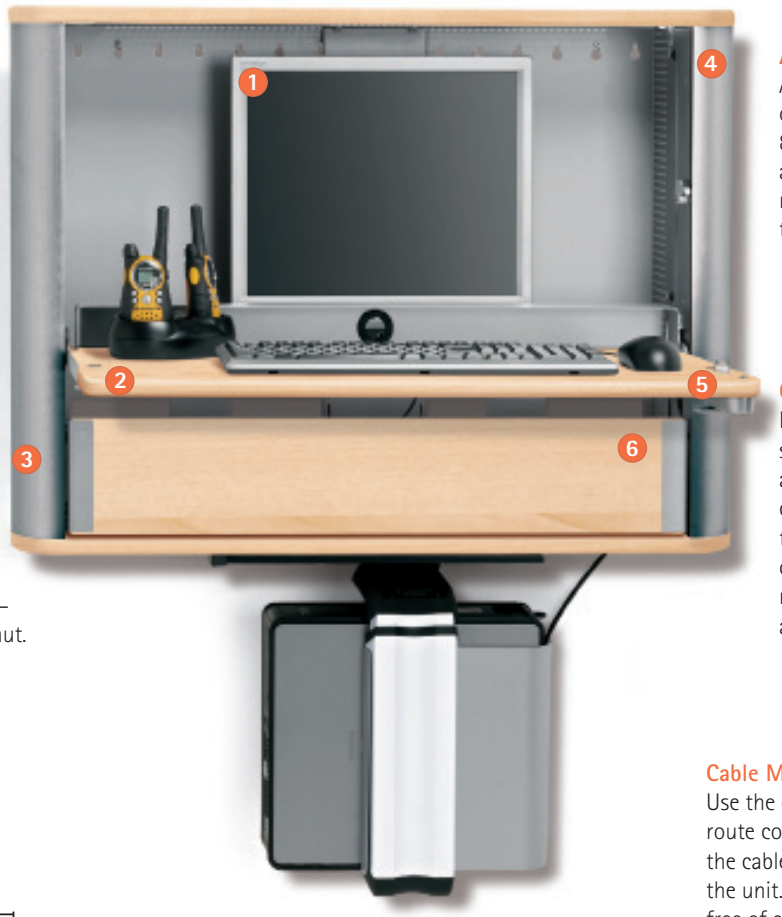
eNook® Pro

best of NeoCon 2006 Gold winner

1 Monitor Options
Tilt the monitor to find a comfortable viewing angle – whether you're 5'2" or 6'2"! Add another monitor rail to display a second monitor.

2 Roomy worksurface
The door opens to reveal a roomy worksurface (30"w x 16"d on the larger model, 24"w x 14"d on the smaller model). Plenty of space whether you're using a laptop, keyboard/mouse, or even a pad of paper.

3 Significant Weight Capacity
The work surface holds up to 50 lbs, and the entire structure supports up to 75 lbs.



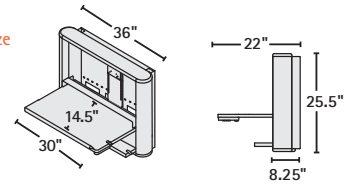
4 Adjustable Depth
Adjust the overall depth of the unit from 7.25" to 8.25" to add clearance and allow even larger monitors to tilt so you get the best possible view.

5 Code Lock
Lock up the eNook Pro so your equipment is safe and secure. Numbered code lock has three security codes for multiple users and to track usage.

6 Cable Management
Use the enclosed twist clips to route cords and cables down to the cable area at the bottom of the unit. Your work area stays free of clutter!

Contemporary Colors
Choose from four standard finishes – Dark Cherry, Maple, White, and Walnut.

Large Size



Small Size
