

CARL'S TABLE® FAMILY

The most advanced radiology workstation to date.

The Carl's Table family of imaging furniture sets the standard for adjustable, ergonomic radiology workstations. Its innovative design and usability earned Carl's Table Best of NeoCon 2008, awarded by international leaders in product design.

Top 4 Selling Points for the Carl's Table Family

Electrically adjust the table's height (30"-49.5" h) and tilt (0-15°) so you can sit, stand, or recline.

Monitor Control System™ moves the entire bank of displays up and down, forward and back, with electric control. *On CT12 only.*

The Adaptive Lighting System adjusts ambient light to match the density of the on-screen image.

Programmable presets store and recall 100 sitting and standing height preferences and reset to you in seconds. *On CT12 only.*

Carl's Table CT12

Carl's Table CT03

Who is Carl?

Our Swedish friend Carl Ohlson, a furniture designer and talented Dixieland banjo picker, built the original Carl's Table to be the most comfortable imaging desk.

"There has been a definite reduction in fatigue as well as back problems since our radiologists started using the Carl's Table and Verté chairs. Customer support is great at Anthro also."
