Re: Anthro letter of RoHS Compliance

Anthro Corporation products which have been certified as RoHS compliant either do not contain Lead (pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium (Cr6+), Polybrominated biphenyls (PBB) or Polybrominated diphenyl ether (PBDE) or the products contain unintentional trace amounts of these substances below the concentration values set forth in the RoHS Directive 2011/65/EU. Specifically, these products contain less than 0.1 % by weight per homogeneous material for Lead, Hexavalent Chromium, Mercury, Polybrominated biphenyls and Polybrominated diphenyl ether and 0.01 % by weight per homogeneous material for Cadmium. Anthro interprets homogenous material in accordance with UK Department of Trade and Industry's RoHS Regulations, Guidance Notes, dated July 2011.

To verify that our products are RoHS compliant, Anthro requires all suppliers to certify the material content data for each homogenous material that they or their subcontractors provide to Anthro.

Any product which Anthro has not certified as RoHS compliant may currently be under further investigation and testing or may deviate from the acceptable concentration values set forth in the RoHS Directive 2011/65/EU.
